EDUCATION

Columbia University Mailman School of Public Health — New York, NY
Master of Public Health: Department of Population and Family Health — Sep. 2025-Present
Certificate: Applied Biostatistics and Public Health Data Science

Queen's University — Kingston, ON
Bachelor of Health Sciences (Honours) — Sep. 2021 - Apr. 2025
Honours: Dean's Honour List (2021-2025), Principal's Scholarship (2021)

Universitat Autònoma de Barcelona — Barcelona, Spain
International Exchange — Jan. 2024 - Apr. 2024

RESEARCH EXPERIENCE

Women's Health Practice Equity Intern, *Department of Obstetrics & Gynecology* — New York, NY
Women's Health Practice, Weill Cornell Medicine — June. 2026 - Present
Supervisor: Dr. Christina Pardo

- Developing and maintaining large-scale databases to support research and quality improvement projects focused on health equity in women's health
- Contributing to sociodemographic analyses of patient outcomes to identify disparities in access to care among underserved populations in New York City
- Conducting statistical analyses examining SDOH screening data with a focus on housing insecurity and its impact on clinical outcomes among patients at the Women's Health Practice, to identify gaps in care and inform strategies for improving equitable service delivery
- Supporting community advisory board coordination and development of multilingual health education materials for outreach and advocacy initiatives

Research Analyst, *Center for Behavioral Health and Youth Justice, Department of Psychiatry* — New York, NY
Columbia University Irving Medical Center — May. 2026 - Present
Supervisor: Dr. Katharine Galbraith

- Serving as data analyst for the MoveUp Project, a randomized controlled trial (n=450) evaluating a 4-session HIV and substance use intervention delivered by health coaches to justice-involved young adults aged 18-24 mandated to alternative sentencing programs, with follow-up assessments at 0, 3, 6, 9, and 12 months
- Developing an independent research question examining the relationships between parental incarceration, social support, and HIV risk behaviors among justice-involved youth, working toward first-authorship of a peer-reviewed publication or conference presentation
- Cleaning and preparing a large longitudinal dataset of social and behavioral self-report data on substance use, mental health, and HIV risk behaviors among criminal legal system-involved young adults using R, Stata, and SPSS
- Presenting analytic findings and progress updates to the broader research team throughout the project
- Maintaining detailed notes, syntax, and outputs for all analyses to ensure reproducibility and auditability of data cleaning steps and descriptive statistics
- Conducting a comprehensive literature review on parental incarceration, social support networks, and adolescent HIV risk to contextualize study aims and support manuscript development
- Supporting grant writing for supervisor Dr. Galbraith's K23 award application for STRIVE, an mHealth app applying DBT-A skills to reduce behavioral health symptoms and recidivism among probation-involved youth
- Attending project meetings across multiple studies including the eConnect project, contributing to cross-project awareness and team collaboration
- Participating in departmental Grand Rounds to deepen exposure to current psychiatric and behavioral health research

Clinical Research Assistant, *Department of Orthopaedic Surgery* — Toronto, ON
University Health Network, Toronto Western Hospital — Apr. 2025 - Aug. 2025

K-Line Project

- Conducted a literature review on K-Line classification and posterior cervical decompression to contextualize study objectives and support protocol development
- Reviewed cervical spine radiographic imaging using Coral Viewer, extracting spinal alignment measures (K-Line, cervical lordosis, T1 angle) from X-rays as part of a retrospective cohort study (N=500) evaluating posterior-only cervical fusion against anterior approaches in K-Line negative patients

AO Spine Needs Assessment Project

Publication (2nd Author): Understanding the Research Needs and Educational Methods of Surgeons to Help Guide Future Spine Deformity Research: A Survey of AO Spine Members. *Global Spine J*. *PubMed ID: 42664305*

- Analyzed and interpreted survey data from 291+ international participants to assess knowledge translation and research priorities in spinal deformity care
- Developed tables and figures to visualize findings; co-primary author of a manuscript (pending), translating quantitative findings into actionable recommendations for research uptake strategies in a peer-reviewed journal
- Second author of a manuscript reporting study findings and implications for improving dissemination and uptake of AO Spine research

Post Void Residual Study

- Extracted pre- and post-operative PVR clinical data from EPIC, transferred and cleaned data in Excel, standardizing variable formats, resolving inconsistencies, and managing missing data to build a structured analytical dataset for ongoing data entry
- Maintained detailed data entry logs and documented cleaning steps to ensure reproducibility across the research team
- Organized and cleaned clinical data using Excel to identify patient baselines and preliminary trends
- Conducted descriptive and comparative analyses in Excel to assess patient baselines and pre/post-operative trends, identifying gaps in measurement practices that may contribute to unnecessary extended hospital stays
- Assisted in developing study protocols and consulted with urologists to ensure clinical accuracy

Research Student *Discover Lab Research Project, Queen's University* Kingston, ON
Supervisor & Principal Investigator: Dr. Nicolle Domnik Sep. 2024 - Apr. 2025

- Collaborated with four colleagues to conduct a year-long project investigating the effects of nicotine consumption on cardiovascular autonomic control and sleep
- Managed longitudinal self-report and physiological data across 2-3 visits for 30 participants, integrating data from 5 instruments into a structured dataset with standardized entry templates to ensure analytic reproducibility
- Cleaned and recoded survey responses from validated behavioral instruments (IPAQ, HADS), calculating composite scores and incorporating derived variables to operationalize substance use and behavioral health outcomes
- Documented syntax, cleaning steps, and analytic outputs systematically throughout the project to support team-wide transparency and reproducibility
- Analyzed data in Excel and created visualizations using GraphPad Prism to summarize findings, translating results into a thesis-style report, poster presentation, and presentations for both academic and community audiences
- Developed research deliverables including a research proposal, notice of intent, SOPs, literature review, scientific poster, oral presentation, and co-authored a comprehensive thesis-style report.

Research Assistant, *Queen's University* Kingston, ON
Supervisor & Principal Investigator: Dr. Nicolle Domnik Sep. 2024 - Apr. 2025
Publication (Co-First Author): *Characterising Oral Synthetic Nicotine Pouch Use in Post-Secondary Students. J Community Health..* *PubMed ID: 40681782*

- Collaborated on a cross-sectional study assessing nicotine pouch use, prevalence, and dependence among Canadian post-secondary students
- Analyzed survey data from 450 participants to assess usage patterns and dependency measures
- Contributed to manuscript writing and editing, ensuring alignment with journal submission requirements for peer-reviewed publication

Independent Student Researcher, *GLPH 471 Course* Kingston, ON
Advanced Global and Population Health, Queen's University Sep. 2024 - Dec. 2024

- Conducted a needs assessment on Spina Bifida and Hydrocephalus in Zambia, evaluating structural determinants, barriers to care, and population-level disparities affecting children and caregivers
- Collaborated directly with a local neurosurgeon in Lusaka to integrate clinical, cultural, and community based perspectives into analysis
- Identified service gaps within House of Hope, a community-based organization and developed and presented an intervention plan to expand rural access, prevention, and follow-up care to reduce disparities

Undergraduate Research Lead, *Youreka Canada* Virtual
Supervisor: Yulin Zhou, Principal Investigator: Nicole Lewis Feb. 2022 - May. 2022
Awards: National Research and Mentorship Excellence Award (05/2022)

- Served as a mentor for a data science research project, leading a team of 5 high school students through a 10-week pipeline of a data science project investigating the effects of COVID-19 Vaccination on hospitalization and ICU bed occupancy, with particular attention to inequities in healthcare resource allocation during humanitarian and public health crises
- Conducted a literature review and built a structured dataset from multiple sources for analysis
- Cleaned and analyzed population-level datasets on COVID-19 outcomes using RStudio, standardizing variables and addressing inconsistencies across datasets
- Translated findings on hospitalization and ICU utilization patterns into presentations for both student and community audiences
- Facilitated increased scientific literacy within my community by presenting research findings, enhancing scientific communication, and leadership skills

Independent Student Researcher, *GLPH 171 Course* Kingston, ON
Social and Physical Determinants of Health and Disease, Queen's University Sep. 2021 - Dec. 2021

- Conducted research on income disparities in colorectal cancer screening using epidemiologic and geographic data
- Synthesized population-level evidence to identify policy and program opportunities to reduce screening gaps
- Developed and presented a research poster analyzing social determinants, access barriers, and inequities in screening participation

WORK EXPERIENCE

Teaching Assistant, *Quantitative Data Analysis (POPF P8623), Columbia University*, New York, NY Sept. 2026 - Present
- Support instruction in quantitative research methods, statistical analysis, and interpretation of public health data using R and RStudio
- Lead office hours, providing individualized guidance on coursework, statistical concepts, and data analysis in R
- Collaborate with professor to support student learning and course administration

Academic Tutor, *Self-employed,* Toronto, ON Sept. 2020 - Present
- Tutored high school students in subjects including functions, calculus, physics, chemistry, and biology
- Improved student performance across math and science subjects by translating complex scientific concepts into clear, accessible explanations tailored to individual learning styles
- Enhanced student engagement and retention of material by developing structured, easy-to-understand written summaries and educational content to reinforce key concepts
- Adapted communication strategies to support diverse learning needs and improve comprehension
- Built and maintained rapport with students through active listening and clear communication
- Collaborated with students to determine needs, define and plan academic goals, and developing tutoring plans to foster progress and development
- Simplified complex topics, adapted to unique needs and learning styles of students, to facilitate understanding and growth

Restaurant Server, *Earls Kitchen + Bar,* Toronto, ON May. 2024 - Jan. 2025
- Handled multiple tables simultaneously with high service quality
- Used POS system to accurately input orders and process payments
- Memorized menu items, ingredients, and specials to answer customer questions, ensure satisfaction, and identify food with potential allergies
- Followed alcohol awareness procedures to prevent guest intoxication and allergy protocols to ensure a safe environment for all

Teaching Assistant, *Human Cell Physiology (PHGY 170), Queen's University,* Kingston, ON Sept. 2024 - Dec. 2024
- Increased student understanding of complex physiological concepts in a class of 100+ students, as reflected in improved participation and performance, by delivering clear, engaging explanations and facilitating discussion-based learning
- Supported student learning outcomes by providing detailed feedback on assignments, improving clarity and critical thinking
- Enhanced accessibility of course material by breaking down complex scientific content into digestible, audience-appropriate formats

Fashion Intern, Antoniette Catenacci Haute Couture*,* Woodbridge, ON July. 2023 - Aug. 2023

Day Camp Counsellor, *The Ivy Day Camp,* Toronto, ON July. 2023 - Aug. 2023
- Supervised 12+ campers aged 4-5 years old, creating a safe and inclusive camp environment
- Developed recreational plans and goals based on skill assessment of each individual.
- Managed conflicts, supported individual needs, assisted in serving meals and snacks, instructing swimming lessons, and ensuring the well-being of campers

Cashier and Barista, *Common Ground Coffee House,* Kingston, ON Sept. 2022 - Dec. 2023
- Maintained high customer satisfaction by providing personalized service and adapting to unique customer needs
- Trained new employees regarding drink preparation and store procedures

Overnight Camp Counsellor, *Camp Winnebagoe,* Huntsville, ON June. 2021 - Aug. 2022
- Supervised 14+ campers, creating positive, safe, and nurturing camp environment for camper development
- Worked respectfully with co-staff, managed conflicts and served as a role model for campers and staff

Certified Ski Instructor, *Alpine Ski Club,* Collingwood, ON Sept. 2019 - Dec. 2021
- Instructed classes with students of varying levels, ages, and physical fitness
- Fostered safe and fun learning environments for individual and group development
- Participated in staff development meetings and training to improve coaching performance

Child Care Provider, *Bialik Hebrew Day School,* Toronto, ON Sept. 2016 - Dec. 2017
- Provided attentive and compassionate care to children, ensuring a safe and inclusive environment
- Worked respectfully with co-staff, managed conflicts and communicated progress to parents

EXTRACURRICULAR EXPERIENCE

Programming & Partnerships Liaison, *Public Health Journalism Club, Columbia University,* New York, NY Oct. 2026 - Present
- Attend biweekly meetings and facilitate communication between student writers, CMPHJ leadership, and the New York Amsterdam News editorial team

- Support the planning and organization of writing workshops, journalism-focused events, and professional development opportunities
- Cultivate partnerships with journalism organizations and community stakeholders to promote accessible, community-centered public health storytelling

Peer Educator, *Sexual Violence Response, Columbia University,* New York, NY Nov. 2025 - Present
- Built foundational expertise in trauma-informed health communication, as evidenced by completion of 40+ hours of NYC DOH-recognized training in survivor support, prevention, and empathetic communication
- Strengthened campus awareness and engagement around sexual violence prevention, as demonstrated through outreach participation and workshop delivery, by co-facilitating presentations, tabling events, and educational sessions using trauma-informed, audience-centered communication strategies
- Enhanced the quality and effectiveness of peer education initiatives by developing and delivering a training presentation for peer educators, improving clarity, engagement, and communication of sensitive health content

Member, *Global Leadership Advancing Student Success, Columbia University,* New York, NY Sept. 2025 - Present
Awards: Tier 3 Distinction in Global Leadership (09/2026)
- Participated in leadership development workshops focused on cultural intelligence, cross-cultural communication, and global engagement
- Collaborated with students from diverse international backgrounds, exchanging perspectives on global challenges and strengthening intercultural communication skills
- Developed and facilitated an interactive workshop, "A Cultural Intelligence Framework for Navigating AI in a Global World," at Columbia's Global Leadership Conference, exploring cultural perspectives, algorithmic bias, and health equity

Graphics Coordinator*, Queen's Cardiac Research Club, Queen's University,* Kingston, ON Sept. 2022 - Apr. 2023
- Increased student engagement with cardiovascular research content, as reflected in social media interaction, by translating complex academic research articles into engaging, accessible Instagram content for a student audience
- Strengthened health communication outreach by developing audience-centered content that simplified scientific concepts into clear, readable, and visually engaging formats
- Improved content quality and consistency by editing posts to ensure accuracy, clarity, and readability for a general audience

COMMUNITY SERVICE AND VOLUNTEER WORK

Adaptive Fitness Volunteer - *Revved Up, Queen's University*, Kingston, ON Oct. 2024 - Apr. 2025
- Assisted persons with disabilities in completing personalized exercise programs by providing tailored support and guidance

Founder - *Healing from the Heart*, Virtual May. 2022 - Dec, 2025
- Founded "Healing from the Heart", an instagram-based initiative, to organize donations, raise awareness of health inequities in Zambia, and advocate for health equity and access to care, with particular attention to children with spina bifida and hydrocephalus

Program Support Volunteer - *House of Hope***,** Virtual May 2022 - Jun, 2024
- Communicated with members in Lusaka to understand health needs, organize donations, spread awareness of health inequities in Zambia, advocate for health equity and access to care for children with spina bifida and hydrocephalus

Volunteer Clinical Assistant - *University Teaching Hospital***,** Lusaka, Zambia May 2022
- Supported physicians in the pediatric neurosurgical department, interacting with pediatric patients and families while advocating for expanded access to care for uninsured patients
- Participated as student in lectures and cadaver labs, observed in surgeries/clinic/recovery wing
- Gained firsthand insight into structural barriers to care including insurance gaps, travel limitations, and stigma, shaping a health equity-focused perspective on clinical care

Inpatient Support Volunteer - *Toronto Western Hospital,* Toronto, ON Mar. 2020 - Jun. 2020
- Supported patients alone in hospital during pandemic with personalized cards, coordinated efforts to engage others, advocated for patient well-being

Senior Citizen Support Volunteer - *Sensing Sunshine,* Virtual Mar. 2020 - Sep. 2020
- Created personalized handwritten cards for senior citizens, advocating for mental well-being, fostering social support and alleviating loneliness

CERTIFICATIONS

Peer Educator Presentation Certification, *Sexual Violence Response, Columbia Health* 2026
Mental Health First Aid Certification 2026
Transportation of Dangerous Biohazard Certification 2024
Transportation of Dangerous Goods - Basic Certification 2024
Anti-Racism Training Certification 2024
Accessible Customer Service Training Certification 2024
CIHR Institute of Gender and Health Sex and Gender in the Analysis of Secondary Data from Human Participants Certification 2024

CIHR Institute of Gender and Health Sex and Gender in Primary Data Collection with Human Participants Certification	2024
CIHR Institute of Gender and Health Sex and Gender in Biomedical Research Certification	2024
Human Blood, Tissues, and Bodily Fluids Hazards and Risk Mitigation Certification	2024
General Biosafety and Level 1 and 2 Containment Certification	2024
Health and Safety Awareness Certification	2024
Tri-Council Policy Statement: Ethical Conduct for Research Involving Humans (TCPS 2) Certification	2023
Workplace Hazardous Material Information System Certification (WHMIS)	2021

SKILLS

Data analysis: Microsoft Excel, Stata, SPSS, SAS, RStudio, GitHub
Data visualization: GraphPad Prism, ggplot2 (R)
Research methods: Survey design (Qualtrics), interview guide development, qualitative interviewing (IDI), quantitative study design
Research and data management: Experience in data collection, organization, analysis, and dissemination
Health Informatics: EPIC (EHR data extraction, cleaning, and analysis)
Scientific Communication: Manuscripts, literature reviews, research proposals, presentations
Clinical Skills: Hands-on experience in clinical settings, including patient interaction and data collection
Teaching and Facilitation: Leading discussions, explaining complex concepts, presentation development, educational outreach
Language: Basic French
